DETAILED ACTION

Priority

Applicants are requested to update the continuation status of this application. 10/335,404, which is the parent of this application, originated from 09/939,272, which originated from 09/769,634, which is a division of 09/350417.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 19-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6,206,972. Although the conflicting claims are not identical, they are not patentably distinct from each other because a process gas diffuser of the present claims encompasses the showerhead diffuser of the cited reference. Moreover, the channel regions and transition region of the cited reference encompass the diffusion stages of the present claims. Therefore, a *prima facie* case of obviousness is established. .

Claims 25-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,284,673.

Although the conflicting claims are not identical, they are not patentably distinct from each other because even though the present claims do not require a showerhead diffuser of the cited reference, the present claims require a diffuser which is encompassed by the showerhead diffuser of the cited reference. Moreover, the channel regions and transition region of the cited reference encompass the diffusion stages of the present claims. Therefore, a *prima facie* case of obviousness is established. .
